Aerospace News -

Mitsubishi Aircraft said its MRJ100X offers fuel efficiency for the growing regional-jet market. "This really just a smaller-size mainline aircraft," Howard Thrall, senior vice president for Mitsubishi Aircraft America. "That's why

we think this MRJ is going to compete and succeed in a very tough, competitive market" ... Pratt & Whitney's success with its geared turbofan has heated up competition with other manufacturers, who are banking on different technologies to achieve fuel savings. Pratt & Whitney is aiming at large commercial planes for its geared turbofans for future growth ... A pending closure at Boeing Wichita, a deep downturn in the general aviation industry and a bankruptcy have cost Wichita thousands of jobs since the end of 2008. At the same time, new programs at Bombardier Learjet and at Spirit AeroSystems, along with strong commercial aircraft orders, have boosted employment at those two companies. The economic downturn that hit the nation and the state in late 2007 delivered an especially hard punch to Wichita. The recession came after three years of record deliveries by general aviation planemakers, and the order books were bulging at Cessna Aircraft, Hawker Beechcraft and Bombardier Learjet ... The Midwest could see success in switching even some of its traditional aviation fuel to biofuels, according to a new report from United Airlines, Boeing, the Chicago Department of Aviation and other members of the Midwest Aviation Sustainable Biofuels Initiative. The report says 3,600 new jobs would be created with each 5 percent of traditional fuel that is replaced by biofuels.

Individuals have certain requirements that do not generally appear on their resumes. Example: availability ... minimum acceptable rate ... location preference .. direct or only contract jobs considered ... do you work on W2 or 1099, etc. A personal profile allows you to make all of this information, and more, available to recruiters. Keep your profile current...especially the status of your availability! This service is only as effective as the effort devoted to it by our subscribers. As long as the majority of our subscribers maintain their Online Profile, and keep the information current, this should be a very beneficial service to both our subscribers and our advertisers.
