**Aerospace News – Boeing wins \$2.5B Poseidon order** - The Navy has commissioned the construction of 20 new P-8A Poseidon aircraft from Boeing, a \$2.5 billion order that includes aircraft for Australia's government. "We continue to hear feedback from our Navy customer about the incredible capabilities of the P-8A," said James Dodd, Boeing vice president. "The deployed squadrons tell us it's exceeding expectations -- we're looking forward to providing even more capability to the fleet and to Australia" ... **Navy opts for unmanned aerial refueling tanker** - The Navy has opted to develop a carrier-launched aerial refueling drone instead of a stealth bomber or scout aircraft in a move that a senior defense official says will address the most immediate need. "The combination of buying more (F/A-18) Es and Fs, freeing up Es and Fs that are currently doing tanking, plus more F-35s, this is the best way to handle the problem in the near term," the defense official said. "Right now, most of the aerial refueling is (Super Hornet) Es and Fs, which is causing a problem when you're already short of fighters" ... **Air Force creates new unit to watch over US satellites** - The Air Force is creating a Space Mission Force that will include 352 people watching over US military satellites. "In our case, we're looking at threats that are within the next year or two," said Lt. Col. Toby Doran. "We're really not looking to the five- or 10-year threat. Among the weapons the military hopes to develop are swarming robot boats, smaller railguns and smarter smart bombs. The Pentagon is also working on transforming one of its existing planes into "a flying launch pad for all sorts of different conventional payloads. In practice, the arsenal plane will function as a very large airborne magazine, networked to 5th-generation aircraft that act as forward sensor and targeting nodes, essentially combining different systems already in our inventory to create wholly new capabilities," he said ... **Raytheon, Honeywell part of 15-company group to win Air Force anti-drug contract** - Raytheon and Honeywell are among companies listed in the Air Force's \$975 million anti-narcotics contract. Contractors will provide equipment and materials to combat threats "posed by illegal drugs, trafficking, piracy, transnational organized crime, threat finance networks, and any potential nexus among these activities" ... **Drone live-streams the way for Antarctic resupply** - A hand-launched drone scouts the safest path through the ice for the US military icebreaker that clears the way for the annual resupply mission to McMurdo Station, the National Science Foundation's Antarctic research center. The 13.5-pound Puma drone streams live color and infrared video as well as laser illumination back to the Polar Star crew, saving on the expense of a scout helicopter ... **Fewer LCSs mean more F-35s, subs, destroyers** - A reduction in new Littoral Combat Ships will enable the Navy to buy more fighter jets, submarines, destroyers and underwater drones, according to Defense Secretary Ash Carter. The Navy plans to buy an additional 13 F-35 fighter jets during the next five years ... **Northrop CEO says autonomous aircraft represent the future of drones** - Autonomous systems will prove a game-changer for unmanned aircraft, according to Northrop Grumman CEO Wes Bush. "I'm talking about cognitive autonomous systems. These are robotic systems that operate using the same actions we would expect from the judgment and, ultimately, the ethics of a pilot," he said, speaking at the Wings Club in New York. "It is not as mysterious as it sounds, but it is an enormous challenge to overcome. And autonomous aircraft will not grow into their full potential until we overcome that challenge" ... **Navy developing supersonic missile to attack enemy ships from long range** - The Navy is at work on an update to the Raytheon Standard Missile 6 that will create a supersonic anti-ship weapon that "can also target enemy ships at sea at very long ranges," according to Defense Secretary Ash Carter ... **Juno probe is on target for rendezvous with Jupiter** - NASA's Juno spacecraft has completed a trajectory adjustment to put it on track to reach Jupiter, with 51 million miles to go.
