US Temp Jobs Rise by 14,800 Overall Job Growth Exceeds Forecast

Temporary help jobs rose by 14,800 in January from December, according to seasonally adjusted numbers released today by the US Bureau of Labor Statistics. The year-over-year growth rate jumped to 3.26 percent in January from 1.23 percent in December. January's job numbers reflect the annual revisions the BLS makes to the numbers.

The temporary penetration rate of 2.05 percent in January matched the newly revised all-time high. The penetration refers to temporary help services jobs as a percent of total employment.

"This was an encouraging start to the year for temporary help job gains, particularly following the employment decline the industry saw in December," said Andrew Braswell CCWP, senior research analyst at Staffing Industry Analysts. On a year-over-year basis, the industry's growth rate is the highest since December 2015."
